Let Our DREAMS Take Flight

The '98 Star Techs

SUNY BROCKPORT

Launch your career.

Patricia Palazzolo '75 did. A 1985 Teacher-in-Space finalist, full-time teacher, and current NASA Space Ambassador, Pat gives students an inside look at the US space program.

In fact, she helped her students design an experiment that flew on the 1998 Space Shuttle Discovery.

The college you attend really does make a difference. At SUNY Brockport student success is our highest priority.

*Success in school.
Success in life.*

What I'm most proud of accomplishing: Being selected as a finalist for NASA's Teacher-in-Space Program and continuing to serve as a NASA "Space Ambassador."

Last book read: *Benjamin Franklin: An American Life* by Walter Isaacson

Favorite SUNY Brockport memory: The Commuter Lounge! The place to study, chat and joke with good friends – including my future husband!

The value of education: Beyond measure – the power to turn your passion into your life's path.

SUNY BROCKPORT
Expect extraordinary results!
brockport.edu

One extraordinary experience: Seeing the wonder in my eighth-graders' eyes as they watched the 1998 Discovery flight carrying a little piece of themselves into space.
